***Information Disclosure Statement***

The information disclosure statement filed July 11, 2002 has been considered and has been made of record; however, the reference DE 4329676 A1 has not been considered because no English language abstract or translation was provided. Therefore, the said reference DE 4329676 A1 has been lined through on the Form 1449.

***Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 2, what are the applicants meaning by the expression "natural circulation"?

The terms "suitable, carried out and sufficient pressure drop" in claims 1-8 are relative terms which render the claims indefinite. The terms "suitable, carried out and sufficient pressure drop" are not defined by the claims, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. Clarification is requested.

***Prior Art***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Jaswal, Liehr, Nielinger, Pipper, Richardson and Brooks are cited to show the state of the art of the discontinuous methods and apparatus of preparing (co)polyamide, nylon.
